

LOGIC

Multi-Brochure

www.logic.gb.com

UET RANGE Top quality Kit Trailer for easy self assembly, or factory built. The basic platform 1500 x 1000 with 80mm sides has many uses and can be extended with 380mm low sides for general use or 800mm high sides for livestock. All Logic off-road trailers are fitted with $\frac{1}{2}$ lapped timber floors, quality stub axles and bead lock wheel rims for added safety.

STT RANGE Low sided very strong all welded construction 1500 x 1000 x 380mm ideal general purpose trailer. 420mm extension sides are available to carry livestock, together with mesh or solid panel headboard and choice of tailgates. Inset shows **RST/RTT RANGE** – Road legal version for general or livestock transportation, choice of wheels and mudguards.

SST RANGE (1500mm long) High sided livestock trailer 1500 x 1000 x 800mm - all welded construction, extremely durable, should still be the same after 10 years use - our most popular model. Choice of wooden ramp, mesh side hinged or half door ramp tailgates. Mudguards available on all single axle trailer models.

SST RANGE (1800mm long) The same construction as the standard SST range only longer at 1800mm, this allows good use of the optional Logic Stockgate System for partitioning the generous carrying area. The gates can be removed in seconds or parked flush with the sides for maximum internal space. Inset picture shows tandem axle option.

SMT 120 A compact monocoque body 1500 x 1160mm with tremendous strength, narrow overall width and good stability. Ideal for woodland use or on mountain tracks for deer husbandry etc. Anywhere the ATV will go the SMT should follow.

SDT 400 All steel heavy duty tipping trailer 1500 x 1000 x 420mm. Designed for hard work - very simple tipping system, ideal for stones, bricks, logs etc. Inset picture shows 22 x 11 x 8 turf tyre option **WT510**.

TGT 400 Tipping high sided trailer 1500 x 1000 x 800mm, tapered for easy emptying. The tailgate doubles as a loading ramp for mowers etc., an ideal general purpose trailer for grass clippings or stable manure etc.

8
OCT/ORT RANGE Designed for larger ATVs to carry bigger payloads. 1970 x 1160 x 300mm standard low sides with ladder rack. ORT is longer and wider at 2250x1310x300mm - extension sides for livestock transport and canvas covers for both models are available.

9
DST RANGE A large flat bed trailer 1970 x 1400mm with standard ladder rack and optional 300mm drop sides. Huge carrying area - good for bags or bales, easy loading height - ideal for garden nurseries, pig units etc. Extension sides available. Inset shows road legal version. Choice of tyres.

10
LBT TIPPING BALE TRAILER designed to self-load, carry and tip hay and straw round bales. Ideal for equestrian units and livestock farms, maximum load 600kg. Inset shows trailer body version available to carry and tip bales and a wide range of materials.

11
CT/RT RANGE Road legal trailers suit a wide range of applications, featuring maximum strength and durability with minimum unladen weight. Ideal for transporting an ATV, is then used behind the ATV off road. Extension sides available.
 CT: 1970 x 1160 x 300mm RT: 2250 x 1310 x 300mm
 Inset shows optional special off road wheel WT810.

12
SRT TRAILER - variation of standard RT trailer range, 2900 x 1310 x 300mm built to accommodate six wheeler ATVs and provide a useful general purpose carrier. Optional loading ramp, jockey wheel and prop stands. Galvanised for long life.

13
EBT300/400 TRAILER developed specifically for the needs of electricity companies. Used to carry an ATV to the site then behind the ATV to carry equipment. Work rates have been improved and land damage compensation reduced. EBT300: 2020 x 1160 x 300mm; EBT400: 2520 x 1160 x 300mm. Options: rear prop stands, jockey wheel and WT810 flotation tyres.

14
LT706 Purpose built to carry larger ATVs e.g. Kawasaki Mule, 4x wheel Polaris Rangers or similar weighted equipment. Body size 2970 x 1550 x 300mm, other features: heavy duty loading ramp, auto reverse brakes, parking brake, jockey wheel and prop stands.

15

MFG FLAIL MOWERS are strong and reliable, suitable for most grassed areas e.g. paddocks, orchards, roadside verges, field headlands, fire breaks, footpaths and lawns. Choice of engines 13hp or 14 and 16hp 'V' twin options to suit widths of 1m, 1.2m and 1.5m. Inset shows version fitted with LGP wheels for difficult conditions.

16

MFG FLAIL MOWERS feature wheels alongside for good height control or wheels behind for minimum overall width. Full width anti scalping roller, off-settable drawbar, wheel options and blade options to suit many conditions from heather to lawns. Inset right shows: A - General purpose; B - Lawn; C - Scarifying blade. Inset left shows: **S216 ROTARY MOWER**, 1.2m wide.

17

LRM120 ROTARY MOWER suitable for paddock topping or large areas of finer grass. Fully guarded open deck design with 3x rotor blades for maximum efficiency. 1.2m wide cut with 12.5hp or 13hp engine options. Easy, infinite height adjustment through range of 10mm to 115mm on standard wheels and 10mm to 165mm on flotation wheels. Inset shows optional LGP wheels which are available for soft ground or higher clearance.

18

TCH100/200 TRAILED CHAIN HARROWS combine a 1.2m or 1.8m chain link web, with a spring-assisted raise and lower frame, supplied complete, or frame only to retro fit existing webs. This enables reversing into corners, lifting the web to clear trash and an easy means of transporting to different sites. Inset shows **CH100/200 CHAIN HARROWS** available in 1.2m or 1.8m widths.

19

MSC120 HORSE MUCK / SWEEPER COLLECTOR picks up wet and dry leaves, grass cuttings and litter etc. **MSC120 HORSE MUCK COLLECTOR** cleans up horse droppings and 'grooms' grazing areas, providing cleaner more productive conditions. Features include winch to assist emptying, offsettable drawbar, 5.5hp engine, remote throttle and easy start clutch. Inset working on AstroTurf.

20

LSH 150/200 SUPER HARROW features Einbock™ technology which pioneered organic weeding and plant stimulation. Grass paddocks are rejuvenated by the action of combing, to aerate the soil surface and remove dead grass. Width options of 1.5m or 2.0m allow fast work rates and feature adjustable tine settings for various conditions and easy transport.

LSS100E SEED SPIDER™ is a precision seeder designed for sowing various seeds eg. Grass seed mixtures. Its electronic metering system can handle a wide range of seed types. Hardened chisel point openers allow direct seeding in grassland, ideal for patching worn paddocks etc. Inset shows **LSS100E** sowing an arable crop. They are easy to use and have workrates of up to 1 Ha/hr.

SG250 MANEGE GRADER provides quick and efficient levelling of many surfaces including equestrian training arenas. It is highly manoeuvrable easy to use and has a perimeter plough to pull in material from the side boards. A wheel track levelling kit allows one pass grading – saving valuable time. Inset shows **SLB600** watering system to water Manege/arena surfaces for dust suppression. See pictures 51, 61 & 62.

LTA160 TERR-ATOR is designed to help those areas that never seem to grow much grass due to feet paddling, poor drainage or capping of the top surface. It produces slits in turf to allow air down to grass roots, breaks up any compacted top soil and generally boosts grazing availability. With repeated use it will produce a tilth for seed sowing. Inset shows blade detail.

BR120/150 BALLAST ROLLERS come in two widths 1.2m or 1.5m. Liquid weight can be adjusted to suit ground conditions, features include large 560mm dia heavy wall section drum for easy towing, 50mm dia axle, long life sealed bearings and adjustable rear scraper.

CTF250 CONTACT 2000 2.5m wide, offers a revolution in contact weed control. It features a unique contra-rotating brush application that provides excellent plant contact due to its "combing" action, with bristles retaining high levels of chemical. Only targeted weeds are treated resulting in tremendous cost savings. Inset shows gang options, 5m and 7.5m are possible.

CONTACT 2000 CTF150 1.5m wide, suitable for smaller areas or where space is limited e.g. woodland nursery management, field margins, lakeside areas and footpaths etc. Inset shows **CTF906 DRAWBAR MOUNTING KIT** for **OBS60** ltr sprayer allowing Contact 2000 use behind any suitable towing vehicle.

27

OBS620S 60ltr capacity spot sprayer. Its unique design allows quick and simple mounting with easy operation and maintenance. Supplied with 10m of hose and hand lance on a wrap around bracket. The 12 volt electric pump works from the ATV battery and produces up to 2.5ltrs/min at 3 bar (40psi).

28

OBS640S 60 ltr Capacity sprayer has the same quick attach design features as the 620 but has a larger capacity pump of 4.5 lt/min at 3 bar (40psi) which enables spray boom operation up to 4 nozzles as well as hand lance use. This unit is ideal for **Contact 2000**. Inset shows **OBS116** '2 outlet manifold for easy connection of 2 accessories eg boom and hand lance.

29

OBS690S 60ltr capacity sprayer with 9ltr/min at 3 bar (40 psi) pump and full pressure control system, operates hand lance and boom options up to 3.5 metres with all the specification of a full sized conventional sprayer. Very easy to attach, use and maintain.

30

OBS134S 135ltr capacity On Board Sprayer with 12 volt 4.5ltr/min at 3 bar (40 psi) pump, hand lance and boom options up to 2 metres. This 'one piece' unit is mounted very quickly and allows easy operation and maintenance.

31

OBS135S 135ltr capacity On Board Sprayer with 12 volt 9ltr/min at 3 bar (40 psi) electric pump, also features full pressure control including regulating valve, pressure gauge and agitation/tank return mixing facility giving correct spraying application for all hand lance and boom options up to 3.5m.

32

OBS610 FRONT TANK 60ltr capacity, can be added to any of the Logic OBS Sprayer range to increase carrying capacity and improve ATV stability by balancing out weight distribution. Attachment is easy using the conventional 'T' bolts or by using straps.

33
TS300S SPRAYER SKID UNIT 250 ltr capacity, provides an excellent value for money sprayer suitable for small / medium sized areas. 12 volt 9ltr/min or 4.5ltr/min pumps are available for options of conventional spraying up to 7 nozzles (3.5m) or spot spraying with hand lance, plus boom use up to 4 nozzles (2m). Inset shows special variation set-up.

34
OBS115 3-POINT LINKAGE MOUNTING FRAME suitable for use on Compact tractors etc, provides a platform to mount any of the OBS sprayer range or electrobroadcasters as well as a general carrying area. This simple system is very easy to operate and increases the versatility of many vehicles.

35
QUICK ATTACH design features include the use of two large hand tightened "T" bolts which quickly secure the OBS sprayer to most ATV carrying frames. Snap couplings are used on boom or hand lance hose connections. Inset shows **OBS CONTROLS**, offering easy access to on/off switch, pressure regulator, spray/agitate lever and in-line filter.

36
OBS BOOMS range from 1.5m (3 nozzle) to 3.5m (7 nozzle) in width, 3 and 4 nozzle booms are rigid with single breakback clutch, 5,6 & 7 nozzle booms are folding with breakback clutches on each wing to ensure no damage when working close to fences or hedges etc. All nozzles including hedgerow nozzle incorporate individual switch off and anti-drip facility.

37
 OBS Options include **OBS111 HANDLANCE** c/w 2m of hose. **OBS113 / 114 HANDLANCE** c/w with 10 or 15m of hose and wrap around bracket. **OBS112PH HOSEREEL** c/w 15m hose and hand lance. **OBS 610 BOOM/ HOSEREEL BRACKET**, suitable for OBS 60 series. **AE500 WIRING HARNESS**, c/w on/off switch. **ATV110 RATCHET STRAPS**, **ATV112 SPRAYLINE REPAIR KIT**. **OBS116 2 OUTLET MANIFOLD** (see inset picture 28).

38
EBC-TFL80/80P ELECTRO BROADCASTERS spreads grass and rape seed, herbicide granules, fertilizer, grain and slug pellets. Hopper capacity is 85ltr, spread patterns adjustable, range of spread up to 24mtrs. Options include manual or powered on/off control and ATV mounting kit. Game feeder version available. (see page 11 inset picture 64). Inset shows alternative mounting.

39

SYSTEM 20 CHASSIS offer a facility to quick attach front mounted equipment to suitable ATVs. The chassis can remain on the ATV without impeding normal use, most models quick attach in seconds. Raise and lower of mounted equipment is normally by over centre lever, but electric lift rams are also available.

40

S215 POWER BRUSH is ideal for rapid cleaning of roads, yards, grain stores, footpaths, parks and sports fields. The unit is 1.35m wide with special end brush, adjustable left or right, with accurate height control and 5.5hp engine.

41

SNOWPLOUGHS have been designed to provide fast snow clearing, ideal for yards, roads, car parks, footpaths etc, also on soft surfaces like playing fields. Models **S211** 1.2m and **S212** 1.5m wide feature rubber wearing strips. **S217** 1.2m and **S218** 1.5m wide feature steel wearing strips and breakback design to cope with ice etc.

42

S219 SWEEPEX BRUSH 1.2m wide with 8 independent rows of bristles provides an economical versatile sweeping system, for light and heavyweight materials. Attachment to System 20 is ultra simple, there are no moving parts so maintenance is minimal and its design permits sweeping in both directions. There is very little dust generated and no flying debris ensures safe operation.

43

S210 YARDSCRAPER suitable for cow sheds, cubicle houses, pig units, poultry units and building sites etc. 1.3m wide, heavy duty one piece blade. Replaceable bottom and wing strips. Manual lift or electric ram option available.

44

S216 ROTARY MOWER is a heavy duty mower offering easy attachment to ATV or similar vehicle with excellent visibility and manoeuvrability. 1.2m wide with triple blades, electric start 13hp engine and easy height adjustment are features of a professional machine ideal for large grassed areas etc.

45

SYSTEM 40 Universal chassis used with an ATV provides an ultra low ground pressure unit suitable for early application work using existing tractor mounted equipment. Shown here with single and tandem axle options, adjustable track from 1524 to 1829mm (60" to 72") available with 5.5hp standard drive engine or reverse drive with centrifugal clutch. Offsettable drawbar is an option for row crop work.

46

S406 TRAILER BODY fitted to a single or tandem axle chassis turns this combination into a really useful general haulage trailer, 1970 x 1160 x 300mm well capable of carrying 500Kg. Extension sides are available for carrying livestock.

47

SYSTEM 40 Single axle chassis fitted here with an Avadex TMA4 applicator provides an ultra L.G.P. unit for use in soft conditions. System 40 chassis can be supplied Road Legal making an ideal unit for large farms or contractors.

48

SYSTEM 40 chassis single axle, fitted with a twin disc fertilizer spreader. Mounted on a simple X member with height adjustment, provides secure installation, correct operating settings and good stability. The 5.5hp engine can be supplied with standard drive or reverse drive with centrifugal clutch.

49

SYSTEM 40 TANDEM AXLE fitted with fertilizer spreader driven by either standard or reverse drive engine provides a unit capable of working in very soft conditions as well as improved stability on steep or rugged conditions. Removal of spreader for tractor use can be carried out in a few minutes.

50

SYSTEM 40 TANDEM AXLE with 12m sprayer shows the low centre of gravity when fitted at axle height. Tandem axle provides very good stability, most important when turning with liquid loads and when travelling over rough ground. Kits can be supplied to bring the operating controls within easy reach.

51

TS400S TRAILED SPRAYER combines all the specifications of a conventional sprayer with the economy of a simple 250 ltr capacity tank. Ideal for small and medium sized areas. 12 volt 9ltr/min at 3 bar (40 psi) pump operates booms from 0.5 to 3.5metres. Other options include handlance and hosereel.

52

LDS500 GROUND DRIVE SPREADER with 365ltr capacity (347kg approx or 6.8cwt) features a spreading bias adjustment, and an ability to spread fertilizers, powders and seeds. It is ideal for upland areas, small paddocks, orchards, large lawns or similar where a general approach to spreading is required.

53

TS500/600 SPRAYERS based on the well proven Hardi sprayer together with design features to ensure maximum flexibility, low weight and low centre of gravity. The sprayer can be used on a tractor or mounted as a front tank with adapter kit for larger tractor mounted sprayers. 12m booms standard.

54

VC100/500 FERTILIZER SPREADERS feature the renowned Vicon varispreader mounted on a L.G.P. chassis. Driven by a Honda 5.5hp engine, spread width up to 12m. Capacities 250kg or 500kg. Inset shows **VC110 – SAND/SALT SPREADER** on the same chassis, driven by a 8hp engine.

55

SLB600 WATERERING SYSTEM to quickly dampen down dust on surfaces such as 'all weather' arenas, tracks, roads etc. Flower bed and hanging basket watering options are also available. 600ltr capacity. Optional self-fill hose. See also page 11 pictures 61 and 62.

56

LSS100E SEED SPIDER™ is a precision seeder for various seeds. Its electronic metering system can handle a wide range of seeds without the need for coating or pelletising. Chisel point openers place the seed at the correct depth, ensuring the best start for game cover or conservation crops. Inset shows **LSS100E** direct drilling grass seeds. Easy to use with workrates up to 1Ha/hr.

57

GDS200 GROUND DRIVE MULTI-SPREADER specially designed for a wide range of materials, particularly salt and sand. Ideal for use on footpaths, shopping precincts, industrial estates and car parks etc. Capacity is 465ltrs. Application rates from 5-80gms/sq m. with offset spreading facility to left or right and spreading widths of 1.5m to approx 10m. See it working on CD Rom.

58 LMF MULTI-FEEDER provides an accurate and time saving system of feeding cost effective bulk feeds to many classes of livestock. Feed is dropped in measured individual heaps at spaced intervals allowing stock to gather round head to head avoiding wastage through trampling. Standard capacity approx 320Kg.

59 LMF TANDEM AXLE MULTI-FEEDER. Seen here with hopper extension sides to carry 500Kg. Tandem Axle provides good stability on steep or rough ground. Ideal for larger ATVs, 4x4's or small tractors. Inset shows Multi-Feeder Control Box featuring on/off switch, digital display of drop number and reset button. A basic control box with on/off switch only is available.

60 LMF MULTI-FEEDER fitted with optional Hard Top/Bale Rack. Can be fitted to existing Logic Multi-Feeders. Shown here with optional larger 25 x 12 x 9 wheels, mudguards and livestock fender.

61 SLB600 BOWSER with or without pump, to allow self fill from a stream etc if required, and to discharge into elevated tanks or troughs. 600ltr capacity, various inlet and outlet pipe options. This unit will easily upgrade to a watering system for all weather surfaces etc. See page 10 picture 55.

62 SLB400 LIQUID BOWSER 250ltr capacity, 1.8metre outlet pipe with ¼ turn tap. Provides a multi use carrying system for liquid feeds, water or diesel etc. Various outlets are available to suit applications. Inset shows **SLB300 SKID UNIT** which allows carrying extra feed or equipment.

63 LCF160 CHICK FEEDER mechanises the time consuming job of laying feed onto paper in poultry houses. Features include hopper capacity up to 500kg, adjustable paper holder up to 1000mm width and 12 volt electrical remote on/off control allowing use with various vehicles, eg. Bobcat. One person can prepare a shed with 1500kg of feed in approximately 20 minutes.

64 LGF TRAILED GAME FEEDER Suitable for larger game feeding requirements. Capacity is approx 320kg or approx 500kg with extension hopper. Handles flowable feeds, grain, pellets etc. Adjustable feed rate and geared, 12volt motor driven disc spreads up to approx 3m. Inset shows **EBC-BD12** with 85ltr hopper and 12v belt driven motor to spread up to approximately 4m.

65

THT400 TIMBER HAULER used with an ATV fitted with forestry chains and electric winch provides a compact extraction unit, minimising damage to growing trees. Features include robust construction, adjustment for different timber lengths, minimum overall width, good ground clearance. Ideal for estates and fencing contractors.

66

THT400 TIMBER HAULER shown here easily travelling over awkward ground due to the pivoting tandem axle and compact design. Options include drop sided posts to assist unloading. Inset shows an ATV fitted with **WINXXX ELECTRIC WINCH** for self recovery or timber dragging.

67

THT200 TIMBER HAULER used for extraction of thinnings or large logs especially in difficult or confined areas. It features a winch to assist loading, a gripping cradle turntable allowing good manoeuvrability and swing down legs for easy unloading.

68

MFG FLAIL MOWER with wheels behind, provides a strong and reliable set up for weed control between trees. **MFG** has a cutting width of 1m and minimal overall width. Engine choice of 13hp or 14 and 16hp 'v' twin ensures there is plenty of power to cope with often difficult conditions including cutting fire breaks in heather. See other options on page 4.

69

CHEMICAL WEED CONTROL in nurseries or plantations can be carried out with safety and economy using **CONTACT 2000**. **CTF150** model is 1.5m wide with minimal overall width. Inset **OBS SPRAYER RANGE** gives great flexibility with boom widths, hand lance and hose reel use. Both products promote great savings over traditional hand methods. See range on pages 6 and 7.

70

PB800 POLE BOGIE use with an ATV, Land Rover or similar vehicle can transport difficult objects like long poles with ease. Its design features adjustable gripping chain and removable drawbar to handle practically any length of pole or pipe etc. max. load 500Kg.

71
S300 'A' FRAME the basis of the System 30 can be supplied as a kit or as part of this **S310KC Calf Crate** product. The adjustable frame and installation kit ensure correct mounting. A ¼ turn spring catch releases equipment to be lifted off.

72
ATV035 ATV SAFETY HELMET with removable peak and wrap around visor, developed with the backing of the H.S.E. (conforms to B.S.EN1384). It weighs less than 500gms, impervious, so can be left in the rain, then worn in comfort. Inset shows **ATV034 HELMET** traditional open faced.

73
ATV113 UNIVERSAL STORAGE BAGS are robust fabric pockets designed to be attached to an ATV fuel tank or to carrying racks. They provide a means of carrying all sorts of useful equipment such as tools, veterinary equipment, spray cans, wet weather gear, note book and much more.

74
ATV WINDSCREENS have been specially designed for ATVs incorporating a stylish glass fibre handlebar fairing which creates an effective brush guard and protection from wind chill. Colour choice allows matching to specific ATVs. Screens are durable perspex with edge trim for added safety.

75
ATV029 SPRAYING KIT PROTECTIVE CLOTHING All you need to comply with H.S.E requirements. Contains face shield, cover all with hood, apron, nitrile gloves, goggles, respirator, nitrile gauntlets and 500 ml bottle of eye irrigation.

76
LTC100 LOGIC TALON CLAMP locks the clamp and the ATV to a concrete floor. Can also be used in a field by preventing the vehicle being driven without extreme difficulty. Approved by NFU and Sold Secure in the UK. Inset shows **ATV058 REVOLVER LOCK**, 1.8m armoured cable core with steel rollers resistant to saws and croppers, covered with vinyl to protect paintwork.

77
STUDED FORESTRY/SNOW CHAINS provide a huge increase in traction especially if tyres are part worn. Wide choice of sizes to fit most suitable ATV wheels.

78

ATV005 HANDLEBAR MUFFS Universal fitting to all ATVs. Durable outer cover with thermal lining, ideal for protection against cold hands – even in Summer. Available in red or black

79

ATV049N HEATED HANDLEBAR GRIPS for use in cold conditions, simple and effective. Supplied with wiring harness and on/off switch.

80

REPLACEMENT SEAT COVERS For re-juvenating worn or damaged seats. Easy to fit, and available to fit most ATV seats. Logic also offer a refoaming and recovering service.

81

WINXXX ELECTRIC WINCH KIT is an essential accessory for forestry work or where self recovery is required. Provides 900kg of pull, 15m of steel rope with hook and remote switch. Special fitting brackets available for individual ATV models.

82

ATV111 PUNCTURE REPAIR KIT suitable for off-road tubeless tyres only. Save time and money with on-the-vehicle repairs. Kit contains rasp and needle tools, repair strips and glue solution.

83

WHEELS, AXLES, COUPLINGS Logic ATV Equip offer a large range of off-road wheels, road wheels, mudguards, stub axles, suspension axles, braked axles, pivot couplings and standard couplings. Inset shows **TB100 TOW BALL** 50mm diameter with $\frac{3}{4}$ " thread and nyloc nut, narrow neck for maximum articulation, includes 10mm hex slot to assist fitting.

84

LOGIC PRO-SAMP is a fully automatic, electro hydraulic soil sampling unit mounted on a Kawasaki 300cc 4 x 4 ATV giving L.G.P. and go anywhere ability. It enables work rates 8 times faster than hand methods with accuracy and economy. Used by Water Authorities, Research Groups and Contractors.

85

KOL93540 FRONT / REAR LUGGAGE

719 x 337 x 131mm heavy duty water repellent exterior, lined with black nylon. Features reinforced panels and collapsible designs to stay upright or lay flat. All zippers prevent ingress of debris.

86

KOL95110, KOL95107 ATV COVERS

available in black or green, features a durapoly nylon construction with reinforced corners, winch gusset and tie down grommets.

KOLPIN PRODUCTS bring state-of-the-art design and technology to the "outdoor" market, re-defining performance standards for ATV and Sports equipment. If this selection is not quite what you are looking for, please ask for more details of this huge range.

87

KOL20051 GUN BOOT IV features a heavy-duty black polypropylene shell with removable and replaceable cushioned lining. The design accommodates shotguns and rifles with right or left hand bolt actions, scopes up to 50mm and attached slings. Inset shows **KOL20029 GUN BOOT IV** one-piece, high density fibreglass reinforced bracket, which secures gun boot in place with pin clip.

88

KOL20090 GUN BOOT 5 TRANSPORT A complete firearm and storage transport system with soft "case within a case" and built-in mounting bracket. It's polypropylene shell provides heavy duty protection with room for 50mm scopes or rifles with slings attached, and bracket adjusts without any tools. The internal soft case features, reinforced padding, waterproof zipper and carry handle.

89 KOL20035 BOOTECTOR BRACKET

for the Gun Boot IV case, which has been designed to release more carrying rack space without compromising on gun boot security. The bracket fits most carrying racks and adjusts without the need for any tools.

90 KOL20070 GUN GRIPS

Molded perfectly to accommodate GUN BOOT IV cases. Secured with patented "Fin Grips" and strap for added security. These grips will bolt on front or rear carrying racks or onto the Bucket Hugger Cargo Tray.

91 KOL91710 BUCKET HUGGER CONTOURED CARGO TRAY

measuring 900 x 450 x 250 is designed to hold 25lt buckets, tools and gun grips. It features reinforced polypropylene double walled construction, with drain holes and large carrying handles.

92 KOL93200 CONTOURED CARGO BOX, KOL93100 FRONT / REAR GEAR BOX

provide great storage options. Both are hard-sided, reinforced polypropylene construction, with recessed "Cam-Lock" catches to prevent snagging. Lids feature weathertight seals to protect contents from dust and mud etc. and will accept a standard lock for extra security.

93 KOL93510 CARGO BAG, KOL93530 FRONT / REAR LUGGAGE

both options feature heavy duty water repellent exterior material with black nylon lining. Collapsible design allows luggage to lay flat or keep in standing position and all zippers prevent ingress of debris.
